City of Durant COVID-19 Update

Employees at the Durant Municipal Swimming pool located at Carl Albert Park have tested positive for COVID-19. The city has informed staff and has done a thorough cleaning of the pool and work stations. However out of an abundance of caution the pool will remain closed at this time. If you or your child have recently visited the pool, you are encouraged to monitor yourself and family members for COVID-19 signs and symptoms like a fever, cough, or shortness of breath. If you exhibit signs or symptoms consistent with COVID-19, the local health department recommends that you seek testing. Testing can be arranged by contacting the Bryan County Health Department (580. 924.4285) or the hospital. While being outside reduces the risk of exposure, it is not without risk.
